

Your path to cloud success with Sofico

In today's fast-paced business landscape, adaptability is key. At Sofico, we offer you a seamless journey towards cloud adoption, ensuring you can reap the benefits without disruption.

Sofico's Miles Enterprise

Miles Enterprise is a comprehensive solution that combines the strength of Miles, with the cutting-edge Miles Microservices Platform (MMP). This powerhouse offers **unparalleled flexibility**, enabling you to independently configure your solution and **seamlessly adapt to new markets**. It empowers you to **manage your entire customer journey**, from initial quotes to contract closure, and integrates real-time data and advanced analytics. With Miles Enterprise, you remain in control, ensuring it always reflects your vision of the world. Your vision, your platform.

Unlock the full power of the cloud

- ✓ **Phased transition**
 Work with sprints and waves to deploy end-to-end business processes, allowing you to already operate in the cloud during set-up.
- ✓ **Business continuity**
 Maintain guaranteed business continuity while transitioning to the cloud by having both your legacy platform and your set-up in the cloud run side-by-side.
- ✓ **Test and transition**
 Test the setup in a phased approach and switch to full-cloud after a successful rollout.
- ✓ **API-first integration**
 Enable Miles Microservices Platform (MMP) to leverage API-first integration opportunities.

Already using Miles?

Have your legacy applications and physical infrastructure hosted by Sofico, while simultaneously deploying the cloud-native Miles Microservices Platform (MMP) in Microsoft Azure.

- ✓ **PaaS benefits for Miles Core**
 Unlock the power of Platform as a Service (PaaS) to enhance Miles Enterprise Core functionalities. Spend your time improving your business processes, without worrying about how to support them.
- ✓ **Early MMP adoption**
 Extend Miles with endless innovation possibilities through secure (public) cloud connections.
- ✓ **AI enablement and data-driven insights**
 Utilize the potential of AI. Explore real-time dashboards, advanced BI, data analytics, and dynamic data visualization to drive customer decision support and innovation.
- ✓ **Security**
 A secure Miles environment is ensured through individual private networks for each customer, secure VPN connections to our back office, and the implementation of robust firewall and intrusion detection measures under ISO 27001 certification.

Curious about your possibilities with Miles?

Sofico stands by your side, offering various ways to support your transformation into a cloud-native player. Reach out to learn how we can support you.
